State of Texas School System IT Directors Invite Salient Systems to speak at Forum

Director of Sales, Page Singletary, traveled east from Austin, headquarters of Salient Systems, to Franklin, TX recently to present CompleteView, Salient's flagship Video Management Software system to a large gathering of Texas Educational Technologists. The forum, a one day event, was hosted by the Texas Delta Coalition of Information Technology Engineers (TDCITE).

The presentation focused on how video surveillance is used in school campus environments as a force multiplier for campus police and security officers, as a pro-active method of providing real-time video for crisis management and for reducing risk in areas such as parking, cafeterias, lecture halls, common areas and athletic events.

Salient attended the event as the guest of TFE (Technology for Education) and David Beaty, one of the top security integrators in the education marketplace. www.TFE-Waco.com

The event was held at the beautiful and brand new Franklin High School, Franklin, TX.
