- Digital PTZ of any camera using common iPhone controls
- Built in support for analog cameras, IP cameras and encoders
- Advanced playback capability, including scrub bar control
- Customizable view layouts - up to 30 cameras simultaneously (iPad)

Salient CompleteView NVR Viewer by DComplex for Apple iPhone & iPad

With Salient Systems CompleteView™ Video Management System and the Salient CompleteView NVR Viewer by DComplex you can bring your video viewing and playback experience to the Apple iPhone & iPad. The combined solution provides mobile access to live video, PTZ camera control and recordings from a powerful, fully integrated interface.

CompleteView delivers everything you need to manage your video surveillance system – from a single server with a few cameras up to a multi server enterprise installation. Analog, IP, megapixel and HD video feeds can all be incorporated seamlessly into a single recording platform. Using the Salient CompleteView NVR Viewer by DComplex, users can break free of the control room and bring CompleteView's powerful live viewing and playback capability wherever they go.

Users can instantly access, monitor and review live and recorded video from any camera connected to any CompleteView recording server in the system. Additionally, cameras from multiple servers can be accessed simultaneously and Pan Tilt and Zoom cameras can be controlled. CompleteView's powerful Dynamic Resolution Scaling feature automatically scales the video resolution for live display, lowering bandwidth consumption and providing higher frame rates over mobile connections.

Salient Systems CompleteView combined with the Salient CompleteView NVR Viewer by DComplex provides the most bandwidth-optimized and feature rich mobile security viewing solution available.
