

Up to 288TB SAN storage

- Protect up to 5 simultaneous drive failures
- Dynamically expandable
- No single point of failure

- Application failover built-in
- Cost savings for power, cooling, and rack space

FEATURES

Self-Healing Platform

- Integrated, automatic failover for CompleteView VMS
- High availability iSCSI SAN protects data from drive or appliance failures
- No single point of failure
- Server-based appliances ensure lowest hardware cost
- Dynamically expandable
- Standards-based architecture
- Remote management

HOW TO ORDER

To order, please send purchase orders to orders@salientsys.com or fax to 512.617.4801. For pricing and part numbers, please contact Salient Systems at sales@salientsys.com.

Pivot3 Scale-Out Application Platform

The combination of Salient Systems' CompleteView™ Video Management System and Pivot3 Scale-out Application Platform™ provides the most comprehensive video surveillance and recording solution for enterprise deployments. CompleteView's rich suite of powerful video surveillance management and investigation tools is optimized for high performance video transmission over an IP network. CompleteView, deployed on the Pivot3 Scale-out Application Platform, is further enhanced with features like automatic NVR failover.

CompleteView's Dynamic Resolution Scaling and multiple compression support enables network friendly video surveillance by minimizing the impact of video feeds on your IP network. Additionally, CompleteView's optimized video processing engine and stable recording architecture make the best use of network infrastructure and server hardware.

Using the combined solution, organizations can reduce total server count saving considerably on rack space, power and cooling. With features like expanding storage on the fly, no single point-of-failure and open architecture design, the Pivot3 Scale-out Application Platform combined with CompleteView future proofs your enterprise security investment.
