

CompleteView™ Video Management Software Integration with S2 NetBox Creates Complete Physical Security Management System

Austin, TX and Framingham, MA (August 25, 2010) – Salient Systems and S2 Security Corporation today announced the integration of Salient’s CompleteView Video Management Systems with the S2 NetBox IP-based physical security management system. Through the integration of these systems, Salient Systems and S2 streamline video management and create a complete physical security system that includes video surveillance, access control and alarm monitoring.

“S2’s commitment to open-source, open architecture products fits perfectly with Salient’s product development philosophy. Offering customers integration with the best products available in the market provides them the freedom to choose the solution that best fits their needs,” notes Per Hanssen, CTO and President of Salient Systems.

The integrated system ties CompleteView’s robust video surveillance features to the S2 access control and intrusion detection system. Users of the integrated system will have access to live and recorded video as well as pan tilt and zoom camera control that can be directly managed through the S2 NetBox interface. Events and recordings can be linked and then called up via the S2 NetBox user interface, making it easy for system users to investigate incidents as needed.

“S2 Security makes our APIs available in order to support innovation by partners such as Salient Systems,” said John L. Moss, president and CEO of S2 Security Corporation. “With our open platform, we are able to work with partners to offer integrated video products that operate seamlessly through the S2 NetBox user interfaces to create complete physical security management systems.”

Integration with CompleteView v3.5.2 is supported in S2 NetBox version 4.1 build 452 and later, and is available immediately.

ABOUT SALIENT:

Salient Systems offers network friendly, comprehensive IP and analog video surveillance management systems built on open standards and open architecture. CompleteView™, Salient Systems Video Management Software is scalable and provides everything needed to manage a multi-server enterprise from a single desk-top. CompleteView can be found in state and local government agencies, municipalities, K-12, college and university campus settings as well as industrial and commercial real estate. For more information about Salient, or to locate a Certified Reseller, please visit us at www.salientsys.com

ABOUT S2 SECURITY:

S2 Security Corporation is the leader in IP-based integrated physical security systems. Unique to the security industry, S2 products are network appliances that require only a web browser to use. S2 products offer cost-effective security for applications of any size, from small offices to scaled, multi-site global enterprises. The advanced, open platform used by S2 Security, coupled with innovative application software, give S2 products a superior total cost of ownership (TCO) throughout the product life cycle. S2 Security systems support access control, alarm monitoring, temperature monitoring, video surveillance and intercom. S2 Security -- Integrated Security for an IP-Connected World®.
