

GuardStation Dual GuardStation Quad

Dual and Quad monitor GuardStation client workstations provide top performance for demanding security control room deployments. Designed for CompleteView VMS, GuardStation client systems provide the tools and capability to view live video, perform investigations and export evidence to a variety of media.

These innovative client workstations are designed to provide the highest performance for client applications in Complete View's VMS without the need for high capacity server processing. Pre-loaded with CompleteView client software and supporting either dual or quad monitor configuration in a desktop form factor, GuardStation offers flexibility and high performance in one location.
